

Warehousing with integrated logistics service

Professional solutions at optimal cost

Why is Révész a good choice?

The RÉVÉSZ Group of companies is one of Hungary's leading logistics service providers, founded, owned and managed by Bálint Révész.

The history of the company dates back to the early 1980's. With decades of experience and an internationally significant fleet, we serve the ever-changing needs of the market.

The close links between the companies in the Group allow us to constantly expand the range of services we offer, therefore we can provide complex solutions for our partners.

Full range of logistics services!

We offer our partners complete SCM (Supply Chain Management) rather than partial services (warehousing, material handling, etc.). Our aim is to provide logistics and related administrative services to our customers.

We ensure a continuous supply of raw materials and finished goods, so that our partners only have to worry about production.

Manufacturing without compromise with RÉVÉSZ

With a fleet of more than 900 trucks, 60 material handling machines and 300,000 m² of warehousing space, there is no logistical need we cannot help you with.

900+ vehicles

We can continuously supply
our partners' production from
our warehouses.

300 000 m²

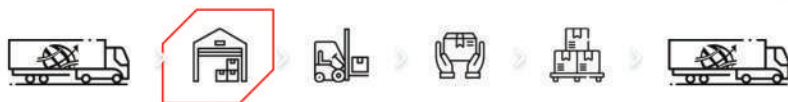

Do you have refrigerated goods or goods requiring
a special storage system?
We can help with that, too!

Expertise and modernity at every point of warehousing

In our warehouses, we use only the most state-of-the-art equipment to ensure accurate and fast service. With our modern material handling systems and machines, we can move your goods between racks with the highest possible safety.

Material handling with state-of-the-art equipment

We are not only at the forefront of metallogistics, but also at the micro-logistical level. Our modern material handling systems and machines ensure the smooth and continuous operation of our warehouses. At our company, the 7P model is not just theoretical, but also practical, which is why we attach great importance to the continuous improvement and reliability of our machinery.

Material storage in safe hands

In our warehousing system, we minimise the size of the administrative areas, thus increasing the usable storage space. Our capacity target is to be able to serve even the largest storage needs with our warehouses.

The principle of our customs agency is to solve our clients' customs brokerage problems by providing a professional service. We carry out our customs brokerage activities under the conditions of an Authorised Economic Operator Certificate (AEO).

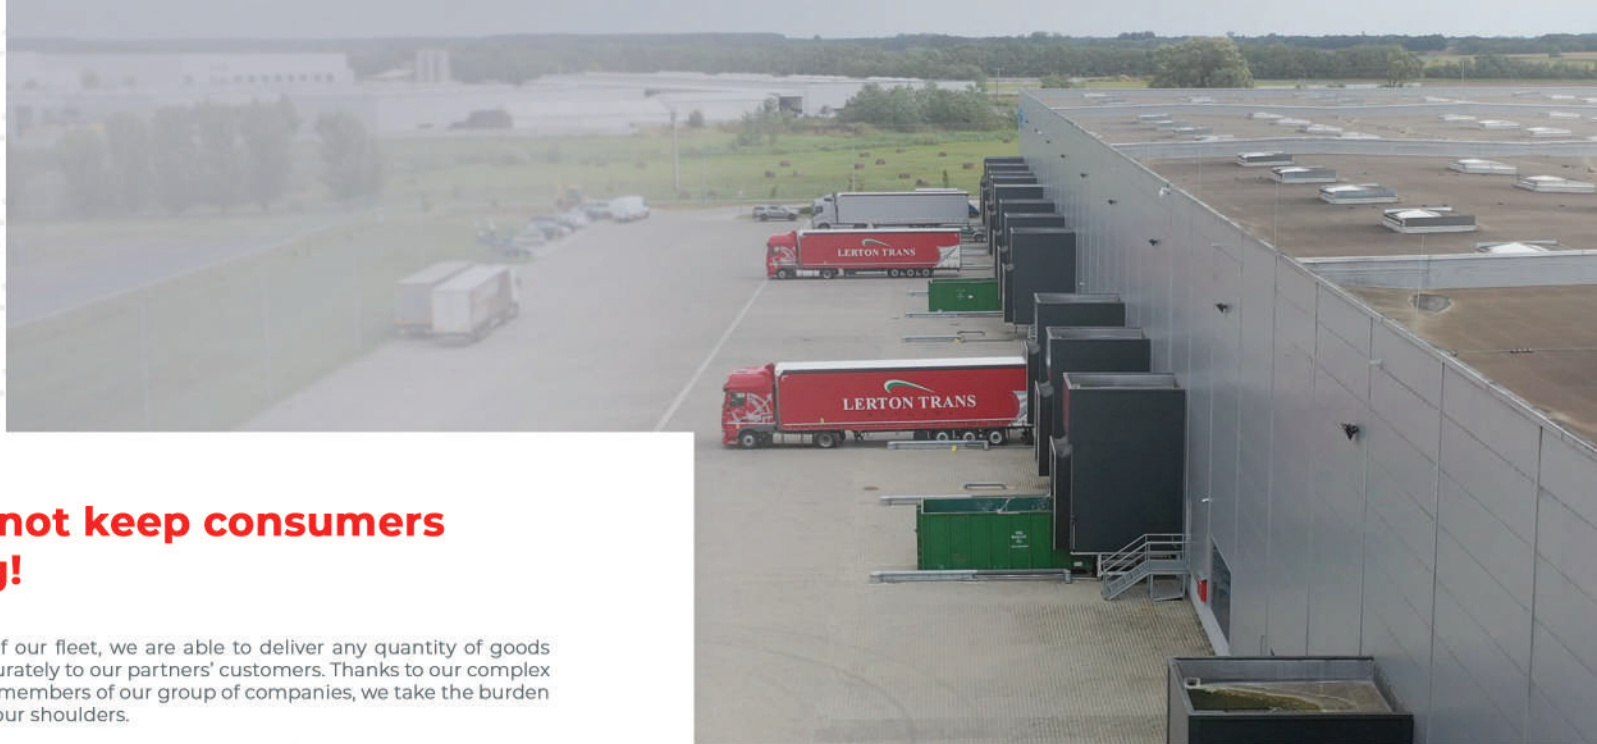

We provide a full range of services, from outward processing, through natural gas and electricity customs clearance, to TIR clearance and we can also provide you with our expertise in AEO authorisation.

We offer a full range of electronic export-import (AIS/AES) customs clearance services, to which we bring not only our expertise but also our experience.

We have the appropriate licences and the highest possible level of competence to carry out our authorised consignee and consignor activities.

Révész DepoSped Llc. was established in 2006 under the aegis of Révész Logistics Holding Co. Ltd. Its main activity is customs brokerage. At our headquarters in Nyíregyháza, we offer our clients a wide range of services, including full customs clearance, statistical data related to foreign trade of goods and specialised customs clearance related to freight forwarding and logistics. Our head office is located in Nyíregyháza, Lego Street 2/a, where we are at the disposal of our customers.

We do not keep consumers waiting!

With the help of our fleet, we are able to deliver any quantity of goods quickly and accurately to our partners' customers. Thanks to our complex system and the members of our group of companies, we take the burden of logistics off your shoulders.

Warehousing according to your needs

We are able to create warehousing units based on individual specifications and requests. We customise the warehouse's storage systems, the automation of its equipment and all the technical details that our prospective partner finds important. We have introduced our system as a unique concept in Hungary and Europe, providing a 100% solution to our partners' real problems.

We serve global brands

Our state-of-the-art warehouses provide a full range of services for the world's major brands.
